-  Difficult broker and farmer management
-  Manual Ticket price adjustments

Say Hello To...

-  Features built specifically for Aquaculture Processing.
-  An easy-to-use system built on modern technology.
-  A fully supported system that grows with your business.
-  Access to all farmer transactions, balances, and settlements.
-  System access from wherever you are.
-  Fast and easy implementations.

The NorthScope Plan

We meet with your team to identify your pain points to understand what's important to you.

We create a project plan that will take away your pain points and is tailored for your success.

We configure your system with your data and hold your hand through training, launching, and beyond.

NorthScope's Benefits & Features for

AQUACULTURE PROCESSORS

Optimize your Aquaculture Processing business with ERP software built for your industry.

Keep your fish farmers farming for you.

Serve your farmers more effectively.

Avoid Ticket errors with automated deductions and accruals.

Correct & re-price Tickets stress free.

Accurately trace from farm to fork.

Effectively manage your business relationships.

Increase productivity among staff.

Seamlessly manage all aspects of your business with a single, cohesive system.

Focus on growing your business with an easy to learn & use system.

Features to help lead your business to success.

All transactions integrated in one place, including Tickets, real time farmer balances, farmer settlements, automated AP Invoices for harvesting and hauling, customer and vendor management, and more.

The ability to automate important calculations based on parameters set by you, including deductions and accruals based on weight or gross amount, the ability to price Tickets from price lists assigned to farmers, auto-calculated brokerage to avoid overpaying, the ability to reprice Tickets in bulk, and more.

Traceability tools to track your inventory, including harvest information used for traceability, the ability to assign quality test results and lot certifications, sales order allocations directly from inventory lots, the ability to accurately record custom processing instances, the ability to track third party warehouses, and more.

Necessary business management tools, including accounting and payroll, inventory, brokerage, rebates & promotions, sales, purchasing, capital improvement project tracking, trace register integration, barcode data collection integration and more all in one user-friendly system!
